

To: Joint Steering Committee for Development of RDA
From: Bill Leonard, CCC representative
Subject: **Changes to Appendix D.0 and D.1.3.1**

CCC thanks the British Library for proposing these changes to provide clarity and the removal of ambiguity. CCC supports this proposal and provides the following comments for consideration.

1. Add a link to the 2011 ISBD consolidated edition from the Other Resources drop-down list in the Resources tab of the RDA Toolkit.
2. Within CCC, there were questions about conformance of the citation to ISBD Consolidated to the current edition of the Chicago Manual of Style. Given that the RDA Toolkit contains several citations to external resources, perhaps these could be reviewed for CMOS conformance.
3. We note that Appendix D is based partly on the 2007 version of ISBD and partly on the 2011 version and realize it may be a larger task to update accordingly.
4. Changes paralleling the wording changes in D.0 could be made in E.0 to maintain the parallel structure. CCC proposes these changes herewith.

MARKED UP:

E.0 Scope

This appendix provides ~~mappings of RDA data elements used to describe an entity associated with a resource to metadata schemes for presenting or encoding access point and authority data.~~ The appendix includes:

- guidelines on the presentation of data derived from AACR2 rules and examples (see [E.1 RDA](#));
- a link to the mapping of the variable fields and subfields defined in the *MARC 21 format for authority data* to the corresponding elements in RDA (see [E.2 RDA](#)).

CLEAN:

E.0 Scope

This appendix provides:

- guidelines on the presentation of data derived from AACR2 rules and examples (see [E.1 RDA](#));
- a link to the mapping of the variable fields and subfields defined in the *MARC 21 format for authority data* to the corresponding elements in RDA (see [E.2 RDA](#)).
