

To: Joint Steering Committee for Development of RDA
From: Dave Reser, LC Representative
Subject: RDF representation of RDA relationship designators: a follow-up discussion paper

LC thanks the CILIP Rep for the considerable work involved in the analysis of the relationship designators in RDA in the context of registering the terms and presenting them in an RDF context.

We agree with the recommendations presented in the report. We have also agreed with the proposed RDA Toolkit changes that have appeared in the Fast Track log, and will be interested in seeing some of the additional changes outlined in Appendix 5 as they are proposed in the log.
