

To: Joint Steering Committee for Development of RDA

From: Gordon Dunsire, CILIP Representative

Subject: Colour Content (RDA 7.17)

CILIP thanks ALA for its proposed revision.

CILIP agrees with the proposal. CILIP has a majority preference for Option 2.

CILIP discussed whether the instructions were intended primarily to distinguish monochrome (including black-and-white and tinted) from polychrome content, and the importance of retrieving content by its colour (for example monochrome red, that is, black-and-red).
