To: Joint Steering Committee for Development of RDA

From: Bill Leonard, CCC representative

Subject: Note on Manifestation and Item

CCC thanks the ALA representative for investigating this issue and proposing solutions.

Note on manifestation and Item, labels and definitions
CCC agrees it is desirable to define separate note on manifestation and note on item elements.
The repetition of elements in chapters 2 and 3 with different sub-elements is acceptable.

Note on manifestation and Item, element sub-types
It is desirable to retain the specific sub-elements for specific types of notes. This will pave the way for linking between a particular "statement" element, and the note about that element.

Changes to the outline of RDA
CCC views option 1 as cleaner but probably not worth the extra work, so we would accept option 2.
