Inaccuracies. For a serial or an integrating resource, correct obvious typographic errors in the title proper. Make a note recording the title as it appears on the source of information (see 2.17.2.4). In case of doubt about whether the spelling of a word is incorrect, transcribe the spelling as found. Record as a variant title (see 2.3.6) the title of a serial or an integrating resource as it appears on the source of information, if considered important for access.

A **note on item-specific carrier characteristic**▼ is a note providing additional information about carrier characteristics that are specific to the item being described and are assumed not to apply to other items exemplifying the same manifestation.

For notes on identifying item-specific characteristics other than those describing carriers, see 2.21.

3.22.1.2   Sources of Information

Take information for notes on item-specific carrier characteristics from any source.

3.22.1.3   Making Notes on Item-Specific Carrier Characteristics

Make notes on item-specific carrier characteristics by applying the general guidelines at 1.10.

Make a note about carrier characteristics of the specific item being described if considered important for identification or selection.

    EXAMPLE

        Numerous wormholes throughout with some loss of text

        Library has copy number 38 of 50; signed by the artist

        Library's copy has errata sheets inserted

        Notes by author on endpapers

Record details of the library's holdings of a multipart monograph, serial, or integrating resource if those holdings are incomplete.

    EXAMPLE

        Library set lacks slides 7–9

Also apply the following instructions, as applicable:

note on item-specific carrier characteristics for an early printed resource (see 3.22.1.4)
note on extent of item (see 3.22.2)
note on dimensions of item (see 3.22.3).
