

**To:** Joint Steering Committee for Development of RDA  
**From:** Galen Jones, CILIP Representative  
**Subject:** Revision of 0.6 Core Elements Draft

CILIP thanks BL for its proposed revision.

CILIP suggests that there is a need for an additional section on application of core data elements, for example in application profiles, with an overview of the core "structure" or "record".

Also, if an Appendix is to be created, 0.6.2 should include both the link to an authoritative list and to the Appendix.

CILIP agrees with the proposal.
