

To: Joint Steering Committee for Development of RDA

From: Alan Danskin, BL representative

Subject: Instruction for choosing the preferred title for choreographic works (RDA 6.2.2.4)

BL thanks CCC for its proposal. We do not support the proposal. We are concerned that this introduces an exception to the general principle of using the original language of the work. We note that this was also the view expressed by a number of EURIG members.

In the longer term, the work will be identified by an opaque identifier and agencies will be able to specify the label they want to display.

While this proposal would encode an LCPS in the instructions we feel that this kind of transitional issue is best addressed by an application profile rather than an exception.
