From: Dave Reser, LC Representative

Subject: Proposals for Subject Relationships

LC thanks the JSC chair for fleshing out this proposal for subject relationships in RDA, and we note the considerable effort that has gone into the proposal. Obviously, the approach found in this proposal is significantly different than the general model identified in the 6JSC/ALA/Discussion/2. As we are quite interested in the possible development of the model suggested by ALA, we think it is premature to respond to this set of proposals until a full discussion can occur. We will refrain from making specific comments on this proposal at this time.
