

To: Joint Steering Committee for Development of RDA

From: Bill Leonard, CCC representative

**Subject: Discussion paper: Mixture of work level and manifestation level in RDA 2.3.2.6
(Collective Title and Titles of Individual Contents), Optional Additions**

CCC thanks the German National Library for identifying and describing this breach of the theoretical structure. In answer to the two questions, CCC agrees that the German National Library has identified a conceptual problem with the optional additions at 2.3.2.6. In terms of a strategy to resolve the problem, CCC favours the solution proposed by ALA in [6JSC/DNB/Discussion/2/ALA response](#). We agree that replacing the “optional additions” with references to section 8 is appropriate.
