

To: Joint Steering Committee for Development of RDA

From: Bill Leonard, CCC representative

Subject: Revision of 2.5.2.1, 2.5.2.2 Designation of Edition, Addition of a core element for Format of Notated Music Statement, revision of affected instructions, etc.

CCC thanks IAML for raising these important issues and for continuing the discussion of the Glasgow meeting in 2011. We greatly appreciate seeing these carefully thought out proposals. We would prefer to see more discussion and demonstration of how increasing RDA's granularity by the addition of the Format of Notated Music statement will support the ISBD and ISMN communities. There continue to be unresolved issues between FRBR, ISBD and RDA in regards to edition, format of notated music and musical presentation statement. We are unable to support these proposals at this time but we wish to confirm our support for internationalization and interoperability.
