

To: Joint Steering Committee for Development of RDA

From: Alan Danskin, BL Representative

Subject: :Adjustment to exception for recording acronym/initialism titles in favor of base instruction (2.3.2.5, exception)

The BL thanks LC for its proposed revision. BL serials cataloguers and UK ISSN prefer to retain existing practice of recording this information as variant title and as other title information.

The issue was also discussed by EURIG. BNF raised compatibility with ISBD as an issue and does not agree with the change.
