

**To:** Joint Steering Committee for Development of RDA

**From:** Bill Leonard, CCC representative

**Subject:** Recording dates in more than one calendar (2.6.7.1, 2.6.9.1, 2.7.6.3, 2.8.6.3, 2.9.6.3, 2.10.6.3)

CCC supports the accommodation of dates from different calendars but feels they should be established as separate elements. While this may be more disruptive, the end result will be in line with how alternative data, e.g. parallel elements in other languages, scripts or numbering systems, has been handled elsewhere in RDA. CCC offers for JSC's consideration, the sketch below of possible revisions to LC's changes 1-5 and 7. These possible revisions establish new data elements for the additional dates but we did not include core statements. CCC did not list all of the places within the RDA Toolkit where new elements will need to be added, e.g. table of contents. The current instructions for these dates may also require a reference to the additional instructions. We realize changes this extensive should probably be handled through a separate proposal, and not through a response. We are also wondering how the particular calendar system will be identified.

CCC counter-proposal to Change 1. Define a new data element 2.7.7 Additional Date of Production.

CCC counter-proposal to Change 2. Define a new data element 2.8.7 Additional Date of Publication.

CCC counter-proposal to Change 3. Define a new data element 2.9.7 Additional Date of Production.

CCC counter-proposal to Change 4. Define a new data element 2.10.7 Additional Date of Production.

CCC counter-proposal to Change 5. Define a new data element 2.11.2 Additional Copyright Date.

Change 6. Add reference to different calendars in the scope of 2.6.9 Alternative Chronological Designation of Last Issue or Part of Sequence. CCC agrees with change 6 as proposed by LC but would prefer the use of "additional" instead of alternative.

CCC counter-proposal to Change 7. Revise the mapping of Additional Calendar Date in Appendix D.1.1.
