Subject: Addition of element sub-types for Award (7.28)

Related document: 6JSC/Sec/77 (Renaming the Award element (7.28))

Abstract: This proposal recommends adding two element sub-types for the element “Award.”

Justification

Cataloguers at public and school libraries have indicated that their users did not always understand that prizes for local or regional competitions were covered by the element “Award.” Those competitions are very important to many users of those libraries.

To address this need for clarification, 6JSC/Sec/77 proposed renaming the element as “Award or Prize.” The JSC discussed 6JSC/Sec/77 but decided that the proposed name and definition were not adequate to address the stated need. This proposal addresses the situation with a different approach.

Issues requiring resolution

The scope of the element “Award” should be clarified so that it includes both national/international and local/regional awards and prizes. Agencies wanting to include local/regional awards and prizes should be able to identify the information appropriately. Agencies not interested in retaining information about local/regional awards and prizes in descriptions created by other agencies should be able to identify easily the level of the award or prize. Establishing sub-types for the element will allow agencies to identify the two categories.

Impact of the revisions

The recommended revisions will serve user needs to identify and select resources based on information recorded in these element sub-types. The impact on legacy data should be minimal; agencies can decide if information in existing records will be

reabeled with new display captions using or paralleling the names of the element sub-types.
