What Our Library Partners Are Saying

“There really was no disruption in our operations. Skyriver just worked from day one. Even better, our suggestions for enhancing the service were appreciated and have been implemented. It’s great to know that you are helping move the library community forward while at the same time saving money for your own library.”

– Dawn Work-MaKinne, Des Moines Public Library

“SkyRiver is functioning, usable, and very easy to use. For my staff it was a change, but not a big change. It was transformative in that we were not under the constraints of OCLC and could seriously think about doing cataloging in a different way. In some sense this whole experience has been liberating. How often do you get a chance to do something this exciting?”

– Nancy Fleck, Michigan State University

“SAILS could not have moved to SkyRiver without the development of a robust batch searching function. We’re proud to have been a development partner for this feature, which works splendidly.”

– Deborah Conrad, SAILS Library Network

“SkyRiver is an exceedingly good fit for libraries such as ours, both functionally and economically. And with SkyRiver’s NACO participation, we look forward to sharing our name authority work on a national level.”

– Jane Costanza, Trinity University

“SkyRiver has allowed us to streamline our workflows. We realized that there were routines that existed to accommodate OCLC that no longer were necessary. It definitely was time for a change and the savings for us were great as well.”

– Ruth Westfall, Suffolk Cooperative Library System
The SkyRiver Story

SkyRiver is a full service bibliographic utility for cataloging and is dedicated to the development and deployment of efficient, economical cataloging services for libraries.

The idea for SkyRiver originated in conversations with librarians concerned about choices when it comes to library cataloging services, removing restrictions on the use of data, and finding a way to reduce costs during tough economic times.

SkyRiver was launched in late 2009 with several development partners and today is a going concern with a customer base ranging from academic to public libraries, as well as a growing list of library consortia. In order to enhance our services, we have built strong relationships with materials vendors as well as with library service organizations such as the Midwest Collaborative for Library Services (MCLS) and LYRASIS.

SkyRiver is one of just three organizations worldwide certified as an active NACO Exchange Partner authorized to contribute authority records to the Library of Congress Program for Cooperative Cataloging.

From the outset, SkyRiver has embraced several important principles:

- **Open data policy**
- **High quality database**
- **Commitment to ongoing enhancement**
- **Economy as well as value**

SkyRiver’s cataloging services include:

- **SkySearch** – record requesting with responses within 48 hours
- **SkySearch Plus** – optional ongoing search service
- **SkyWatch** – optional CIP record upgrade notification
- **SkyMatch** – materials vendor data integration

For more information please email us at info@theskyriver.com

Features and Benefits

**Open Data Use Policy**

SkyRiver makes no claims to ownership of any bibliographic metadata and imposes no restrictions on subsequent use.

**Unlimited Data Access and Transfer**

SkyRiver offers annual subscriptions at a flat rate for unlimited use. There are no additional access fees.

**Full Service, Affordable Price**

SkyRiver provides comprehensive cataloging services at prices significantly lower than the competition.

**Easy Integration with Local Library Systems**

SkyRiver is ILS independent.

**High Quality Database**

SkyRiver’s database of roughly 30 million records, including the full LC and CONSER files, is constantly updated. Sophisticated matching algorithms minimize duplication and sub-standard records as well as update and improve records.

**Elegant, User-Friendly Interface**

Designed and optimized for technical service staff, SkyRiver’s interface is intuitive and easy to use, allowing libraries to increase workflow efficiency.

**Customer Focus**

Frequent cataloging client updates are deployed with user-suggested enhancements. SkyRiver’s proactive customer service is available 24/7.

This book not only provides information about and comparisons of libraries; it is also a story of libraries and books from the earliest times to the present. The hundreds of facts about libraries, periodicals, books and reference databases around the world illustrate their evolution from crude and simple to sophisticated, complex and efficient” – Provided by publisher.
