From: Chris Holden, Technical Team Liaison Officer
Subject: Proposal to add condition options regarding preferred recording source in Data provenance: Recording a source of metadata that is a manifestation that is being described

The Technical Team Liaison Officer appreciates the Examples Editor taking feedback from past proposals into account and producing this proposal so quickly. It will allow RDA to address unforeseen scenarios when choosing sources of information. I also would like to thank the former Rare Materials Working Group for first suggesting this option in 2016.

Recommendation 1: Add a new condition option for the general condition (65.53.81.13) of the Data provenance: Recording a source of metadata that is a manifestation that is being described section.

Approve.

Recommendation 2: Add a new condition option for the *early printed resource* condition (20.89.89.54) of the Data provenance: Recording a source of metadata that is a manifestation that is being described section.

Approve.
