Subject: Formal response to RSC/ExtentWG/2025/1/Proposal for Manifestation:  
extent of manifestation and Manifestation: manifestation extent statement

EURIG thanks the Extent WG for this family of proposals.

We acknowledge the development of RDA as a standard which is optimized for machine actionability and linked data applications and that for these applications a more granular approach to recording values for extent may be desirable. We would appreciate a timeline from RSC for creating the string encoding schemes for extent in a dedicated Community Resources section of the Official RDA Toolkit.
