Subject: Formal response to Soft-deprecated elements specific to content and carrier types

I approve the proposal because these elements were correctly identified during the 3R Project as redundant carrier-specific refinements that duplicate relationships already expressible through broader RDA elements and carrier type data. Their full deprecation simplifies the RDA model, improves semantic consistency and interoperability, and will have minimal impact on cataloguing practice because the same information remains recordable through broader existing elements.

Recommendation 1.1 Item: filmed with item

Fully deprecate this element in the RDA Registry and remove it from the Toolkit.

Remove the element from the alignment of soft-deprecated elements in the RDA Registry and add it to a new alignment of fully-deprecated elements to RDA elements.

Remove Item: filmed with item as a narrower element of Item: held with in the Toolkit and the RDA Registry.

**Approve.**

Recommendation 1.2: Item: on disc with item (Fully deprecate)

**Approve.**

Recommendation 1.3: Manifestation: filmed with manifestation (Fully deprecate)

**Approve.**

Recommendation 1.4: Manifestation: on disc with manifestation (Fully deprecate)

**Approve.**

Recommendation 1.5: Expression: scale of still image or three-dimensional form (Fully deprecate)

**Approve.**
