Subject: Formal response to RSC/ExtentWG/2025/4 – Proposal for Manifestation: <u>extent of aggregated content</u>

Recommendation 1.1: Create the element Manifestation: <u>extent of aggregated content</u>. In the Prerecording section include the language establishing this element as a subelement of Manifestation: <u>extent of manifestation</u> and providing the option of using a value of Manifestation: <u>manifestation extent statement</u>. Associate the new vocabulary encoding scheme RDA Extent of Aggregated Content with this element.

I approve in principle, but note that there is inconsistency on page 2 of the proposal: is the new VES intended to be called "Extent of Aggregated Content" (as appears in the full recommendation statement) or simply "Aggregated Content" (as appears below the paragraph starting with "Under Recording a structured description…" and elsewhere in the proposal).

Recommendation 1.2: Refer the issue of using terms from the vocabulary encoding scheme RDA Format of Notated Music for a possible source of values for Manifestation: <u>extent of aggregated content</u> to the RSC Music Working Group.

I approve.

Recommendation 2: Update Manifestation: <u>illustrative content</u> to use values from RDA Aggregated Content.

I approve in principle, but would like to ask why the term "illustration" could not also be moved from VES: RDA Illustrative Content to the newly proposed VES: RDA Aggregated Content.

Recommendation 3.1: Create a new vocabulary encoding scheme RDA Aggregated Content.

I approve.

Recommendation 3.2: Recommended terms for RDA Aggregated Content derived from the current RDA Carrier Extent Unit vocabulary:
